SE-RHT03

Product

RHT03 is a high-precision digital sensor module that can measure temperature and relative humidity. It is suitable for various applications such as environmental monitoring, industrial control, and smart home systems. The module is easy to use and provides accurate data.

The sensor module supports I2C and SPI communication protocols. It also features an OTP (One-Time Programmable) memory for user-defined parameters. The module is designed for long-term stability and accuracy.
