- Slider to brighten or dim light
- Rocker paddle switch
- American Standard
- 150W for LED/CFL
- 600-Watts of Incandescent and Halogen bulbs

ENERGY SAVING

The dimmer works with Dimmable CFL,LED and Inc, a great energy-efficient alternative that can save energy by reducing light level.

By using less electricity, these bulbs could protect the environment by reducing the amount of carbon dioxide released into the air.

PRECISE LIGHT ADJUSTMENT

Whether you're reading, watching TV, entertaining, or enjoying a romantic dinner, the Keygma Dimmer lets you choose the right level of light for your activity. It's easy to make subtle adjustments using the discrete slider.

WORKS WITH DIMMABLE CFL,LED AND INC

This dimmer switch provides the best dimming performance for use with 150-watt dimmable CFL, 150-watt dimmable LED lights and 600-watt dimmable Incandescent. It can be used for single-pole and three-way applications.

FAST AND EASY INSTALLATION

Just replace your existing light switch with the Dimmer and install in less than 15 minutes. A modern wall plate blends into the surrounding wall for a subtle finishing touch.
