

WiFi Smart Outlet Wall Plug in 15 Amp Power Socket with 2 USB Ports 4.8A and Night Lights, On/Off Outlet Switch

AC / USB smart wall outlets - Convenient and power-efficient plug in wall solutions for powering and recharging USB devices.

Designed for standard 15A circuits in homes and other living spaces.

Compatible with Alexa Echo and Google Home, No Hub Required.

Smart design

Wall outlets dual USB chargers use advanced technology to provide the most efficient

charging for each device. Plug and play.

The USB port is controlled by a smart chip that recognizes the charging requirements of each unique device and optimizes the current to reduce charging time.

This allows users to spend less time waiting for the device to charge and more time enjoying them. The USB port is type A 2.0, with a combined power of 4.8 amps.

The USB charger duplex socket has two high power ports and is ideal for charging tablets and other high performance portable devices.
